## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Watanabe (U. S. Patent 5,259,111).

Regarding claim 1, Watanabe, see figures 4-6, discloses a method for producing male terminal fittings 11, comprising: performing a press-cutting step for press-cutting a base plate 12 to define original (see figure 4) forms of terminal fittings provided with base ends (see figure 4); and forming plated surfaces on outer surfaces of the original forms of the terminal fittings.

Regarding claim 15, Watanabe (see figures 4-6) discloses terminal fitting formed of a base plate 12 having opposite first and second surfaces and opposite side surfaces extending between the first and second surfaces, the terminal fitting 11 comprising a base end (see figure 4) and a leading end, a single layer of plating 5, column 2, lines 5-10, extending across the first and second surfaces along the entire terminal fitting and extending across the side surfaces at the base end, the side surfaces being non-plated at the leading end of the terminal fitting.

***Allowable Subject Matter***

3. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the reference discloses a part of the base plate to become leading ends without being press-cut.

4. Claims 9-14 are allowed.

5. The following is an examiner's statement of reasons for allowance:

None of the reference discloses and performing a second press-cutting step on the base-plate for forming a plurality of spaced-apart leading ends adjacent the second edge, each of said leading ends having two opposed cut edges extending between the first and second surfaces, such that the cut edges of the leading ends are non-plated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong KT Dinh whose telephone number is 571-272-2090. The examiner can normally be reached on 8 -5, 5 days a week.
